

RHOBA PURIA Z204

(RHOBAFLOCK K99)

ARTICLE-NO. 010021

Special concentrate to activate and enhance the coagulation process

APPLICATION

RHOBA PURIA Z204 is added to the spray booth water whenever pH-value lowering paint ingredients and substances interfere with the safety of the coagulation process. It is also used to enhance coagulation.

The application quantity is determined for you by our laboratory or by our application technicians "on site". Cost-saving and reliable dosing is guaranteed by the RHOBA UTILA T101 pH-value dosing pump.

PRODUCT FEATURES

- liquid and easy to dose (manually or automatically)
- can be used in all water-sprinkled spraying systems
- guarantees long service life of the circulating water
- non-abrasive, gentle on pumps and pipelines
- maintains the pH-value of the circulating water at the specified value
- very low application quantities, as dosing does not depend on the overspray
- frost-sensitive

TECHNICAL DATA

Appearance	liquid
Density at 20 °C	1,4 g/cm ³
pH-value at 20 °C	> 13

Before application, test material compatibility at an inconspicuous area. Follow the cleaning and care instructions provided by the manufacturer. We cannot be held liable for improper use and resulting damages.

STORAGE

Storage temperature: 5-30 °C

Shelf life: 12 months
