

RHOBA SUPRA B201

(RHOBATEC KABINENFETT)

ARTIKEL- NR. 110005

Permanent protective coating for paint spraying equipment (Wet and dry cabins)

APPLICATION

The surface to be treated must be dry and clean (oil-, grease- and dust-free) (pre-cleaning with our **RHOBA LAVIA L** or **W** grades). Remove color mist deposits beforehand with our **RHOBA SUPRA E** types. Then **RHOBA SUPRA B201** is applied thinly with a brush or a roll. The removal is done very easily and quickly by pushing with a spatula or similar.

Then, as usual, reapply **RHOBA SUPRA B201** immediately.

PROPERTIES

- solvent-based
- protects all surfaces and substrates, e.g. in water-sprinkled paint spraying systems, which are not sprinkled by the water and are therefore constantly "painted" unintentionally by paint mist spray
- can also be used cost-effectively in drying cabins
- is easy to use due to manual order
- significantly reduces the later cleaning effort, no tedious and time-consuming removal, as e.g. with peel-off varnishes or the like; no cost-intensive paint stripping, simply strip off with a spatula or similar
- is excellent water repellent
- reliably protects against corrosion

TECHNICAL SPECIFICATIONS

Appearance	Paste, red
Density at 20 °C	ca. 0,92 g/ml
Flash point	> 170 °C

Before use, check material compatibility on an inconspicuous area. Observe the manufacturers cleaning and care instructions! No liability can be accepted for improper use and resulting damage.

STORAGE

Storage temperature: 5-30 °C

Shelf life: 12 months
